

REYNARD CORPORATION

Perfecting Your Light™

Quality Note – QN0003 Rev. 1

PRODUCT INSPECTION

Reynard Corporation reserves the right to inspect the product(s) or processes associated with a Purchase Order at the suppliers' facility, including the quality system. The supplier shall provide the time and resources to support the inspection. Inspections may include, but are not limited to, validation of compliance to the specification/drawing/notes, review of record keeping and documentation, witness testing, instrument compliance, completeness of the procurement package, and packaging. Where flow down requirements come from an up-tier Buyer, that up-tier Buyer is granted the same access as the Buyer.

Product shall not ship until either a written satisfaction from Reynard is provided after an inspection, or the Reynard provides a written waiver of inspection.
