Quality Note – QN0008 Rev. 1

## **Counterfeit Material**

Counterfeit material is identified as illegal or unauthorized replacement or substitution of an Original Equipment Manufacturer (OEM) product.

All material identified in a Reynard Corporation Purchase Order shall be from reputable OEMs, and must contain a material certification (Certificate of Conformance, melt data, etc) indicating that the material is authentic. If counterfeit material is identified upon receipt of goods, immediate action must be taken to investigate root cause and responsibility.

Vendors appearing on the Reynard Corporation Approved Vendor List (AVL) shall have a program in place to mitigate risk of the receipt and usage of counterfeit materials (using SAE AS5553 as a guide).
